# Safer, Healthier Water For The Home

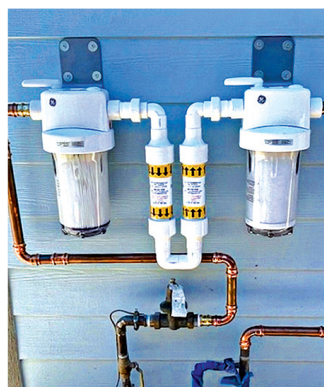

**E**ver thought about what's really in your water?

Have you considered that no matter how clean your water is at the source where it's tested, it may be contaminated by the time it reaches you through Hawai'i's aging underground infrastructure? Unsafe levels of iron and lead are the usual suspects here, and many other harmful contaminants may go undetected. Drinking water is most people's primary concern, but imagine absorbing several ounces of whatever comes through your tap every time

you take a shower or bath. The HDC Whole House Water Purification System offers protection and essential health for your entire family.

If you're thinking that this is just another filtration system, there is so much more to this story.

In short, it all started when HDC Products founder and inventor Keith Morrill of Honolulu made the discovery of a lifetime with a specialized device for pools and spas. This breakthrough invention vastly reduces the need for toxic chlorine and salt systems in swimming pools and

spas and also reduces evaporation, saving water. This remarkable discovery led to more testing and, to his

amazement, he found that this device, with a few modifications, creates phenomenal water for the whole home.

Reported natural benefits of HDC purified water include:

- Reduction of bacteria, viruses, pathogens and heavy metals
- Softer, great tasting water from every tap in your home
- Softer hair and smoother skin
- Improvements from incurable skin diseases such as eczema, psoriasis and other painful and debilitating skin conditions

• Reduced water spots in showers, sinks and around pools

• Much-improved lawns and gardens.

Sound too good to be true? All HDC products are fully patented and come with a 120-day, 100% money-back guarantee and a 10-year, non-prorated warranty.

There is NSF-372 certification for drinking water. The same hydrodynamic cavitation phenomenon of nature harnessed by HDC devices has been thoroughly scientifically tested and utilized in larger very expensive indus-

trial applications. However, we are the first company to provide such an accessible, simply installed, economical and eco-friendly solution for residents and businesses who seek better health and peace of mind for their water needs. It is a great honor to serve our Hawaiian Islands and beyond.

Experience HDC Products water to taste and feel the difference.
